Summary

Results-driven IT professional with 2+ years of experience in automation testing, system validation, and infrastructure technologies including Jenkins, vSphere, SQL, Python, and virtualization environments. Recently completed a Master of Science in Information Technology with a concentration in Artificial Intelligence from Southern New Hampshire University, expanding my knowledge in networking, systems administration, cybersecurity, cloud technologies, AI, and software development. I enjoy solving technical challenges, learning new technologies, and building practical solutions that create real-world impact. Currently seeking full-time opportunities in Network Administration, Systems Administration, Software QA, or related IT roles where I can apply my skills, contribute to organizational success, and continue growing as an IT professional.

Experience

Southern New Hampshire University

Masters Student

September 2024 - April 2026 (1 year 8 months)

Manchester, NH

Calsoft

2 years 5 months

Development Engineer

June 2022 - May 2024 (2 years)

India

As a Development Engineer, I was responsible for designing and executing comprehensive testing frameworks for enterprise-level systems. My role included creating and managing virtual machines (VMs) in vSphere with tailored data storage configurations to meet test requirements. I maintained

detailed documentation on Confluence for OS qualifications (PCE OS and VEN OS), ensuring transparency and collaboration across teams.

I developed, executed, and managed automated test suites in Jenkins using targeted testbeds. My contributions involved modifying existing code to align with testing objectives, ensuring both functional and non-functional accuracy. I worked extensively on advanced test areas including RBAC SAML, Kerberos, High Availability (HA), and PCE support.

Additionally, I was involved in designing and deploying testbeds for various testing scenarios, including large-scale supercluster setups such as 2x2 and 4x2 multi-node configurations. My focus was on delivering thorough, high-availability, and scalable system validation under real-world conditions.

Internship Trainee

January 2022 - June 2022 (6 months)

Bangalore Urban, Karnataka, India

Network Engineer

January 2022 - May 2022 (5 months)

India

Configured and monitored network switches, routers, and Ubuntu virtual environments. Assisted in troubleshooting connectivity issues and maintaining technical documentation.

Education

Aditya College Of Engineering

Bachelor of Technology - BTech, Computer Engineering · (June 2018 - June 2022)

Narayana junior college

Mpc · (August 2016 - May 2018)

Southern New Hampshire University

Master of Science, Information Technology · (September 2024 - April 2026)
